## CENTRAL INTELLIGENCE BULLETIN

7 June 1965

**\*Dominican Republic:** (Information as of 4:30 AM EDT) The rebels are seeking to expand their contacts abroad as they continue to press their strongly anti-US propaganda line at home.

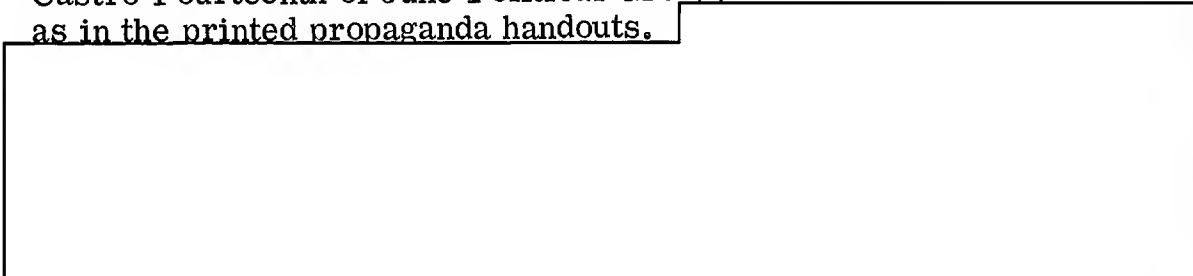

The rebel Caamano government has named a five-man delegation to the Geneva conference of the International Labor Organization. Four members have already arrived in Geneva and are likely to put up a strong fight for formal accreditation.

The rebel-controlled radio announced yesterday that the Dominican Lawyers Association has inquired about sending a delegate to the Afro-Asian Conference which is scheduled to open in Algiers late this month. The association, which is Communist-led, is said to have asked the organizers of the conference to permit a Dominican representative to explain "the seriousness of the US intervention in the Dominican Republic."

25X1

Meanwhile, the propaganda being disseminated on the rebel-controlled radio continues to be strongly

anti-US. This has been particularly evident since the mass rally staged by the rebel government on Saturday. The tone of that rally was more blatantly anti-US than on any previous such occasion when top rebel leaders were present. Communist influence was evident in the presence in the crowd of armed men wearing the distinctive "uniform" of the pro-Castro Fourteenth of June Political Group, as well as in the printed propaganda handouts.
